

CUBITAL TUNNEL SYNDROME

Do You Experience...

- Numbness in your ring and small finger?
- Waking up during the night with your hand asleep?
- Pain and/or numbness in your hand while talking on the phone or resting on your elbow?
- Aching in your elbow that makes you feel like you hit your “funny bone”?

If so, you could be suffering from

CUBITAL TUNNEL SYNDROME...

Cubital Tunnel Syndrome is the entrapment of the ulnar nerve at the inside of your elbow. This causes weakness and can make muscles shrink in the hand if allowed to progress.

You could benefit from Hand Therapy specializing in activity modification, splinting, modalities, and exercises designed to alleviate your symptoms.

If you have hand pain that won't go away, schedule an appointment with one of the surgeons at the Hand Center of Southwestern Ohio.
